Ruskin lived in Victorian times and enjoyed the wealth that these brought to some families.

He was more than an admirer of Turner and his writings about him reached across the Atlantic.

He was a teacher to the educated and the uneducated, championing the cause of the poor and their right to educational amenities.

He also travelled widely in Europe and drew, painted and worked as an art critic. However, he was more than even that and wrote on many subjects most of which seem very current in the twenty-first century.
