

Group Three - for October 10<sup>th</sup> LRB article re books supporting cultural understanding.

First of all I would simply like to talk about which of these six books would interest you most and secondly may be which of them you think might win the prize for improving global cultural understanding.

The introduction is a bit difficult and not really important for us. Here's some help:

contribution - payment but not necessarily in money, offer

fiction - non-fiction = true and untrue

range - great variety, great choice

trailblazer - somebody who does something new

ground-breaking - changing, new

determine - decide

record-breaking - bigger or better or....

dictate - to say something must be (like a dictator)

outstanding - ditto

exceptional - ditto

highlight - emphasize

reward - pay, give a prize

underpin - support

Much later I found another article giving the same information but sometimes in different words. Of course you don't need to read it but here is the reference:
